

ON BOUDICA'S TRAIL: INNOVATIVE RESEARCH

**A one-day conference, June 29th 2013, at Warwick University, on recent work at Mancetter,
with historical and military context.**

A conference considering recent research based on Dr Graham Webster's hypothesis which situates Boudica's last battle somewhere close to Mancetter, alongside research into other battle-site hypotheses; presented against a background of up-to-date thinking on the historical and military context.

Key speakers: Professor Aldhouse-Green and **Professor Richard Hingley** provide the context for the Boudican campaign and subsequent evaluations of Queen Boudica over the centuries; archaeologist **Martin Wilson** portrays the Roman presence in Mancetter.

Recent exploration of Mancetter's candidacy as the site of the final Boudican battle will be presented, and alternative sites discussed.
